File Sharing	FTP	21 & 20
Dynamic Host Configuration Protocol	DHCP	546
Domain Name Service	DNS	53
Online Gaming	DOOM	666 (different for each Game)
Remote Desktop	RDP	3389

Dynamic Host Configuration Protocol

This assigns IP addresses to the host computer depending on which Domain Controller (Server) it contacts. It then takes the IP back once communication has finished. It also contains information on the default gateway and where your local domain server (the IP) is. This service runs at the boot up for the host computer but is a service that is run from the server.
